The first steps:

If you would like to establish a *Bluetooth*® connection for the first time, you must activate the *Bluetooth*® function in your mobile telephone and start the search for *Bluetooth*® devices. Search for a device with the description „CC 9060...". If several devices have been found, please select and connect the CC 9060 and enter the **PIN number `1234´.** The subsequent functions are described in the operating manual.

Voice commands which are valid for all menus:

Cancel	Help / What can I say	Back	Head menu
Ends the voice control function.	By saying Help you can hear the commands, which are available in each submenu.	One step back.	The main menu is open.

The most important voice commands:

Head menu					
Dial Joe Bloggs	**Dial number**	**Phone book**	**Redial**	**Call lists**	**Music**

Will not be displayed in the head menu.
 	
Will not be displayed in the head menu. Direct call of a phonebook entry.
 	
If you have saved more than one number for one person, you can dial directly via the category, e.g.
 	
„Dial Joe Bloggs home"
 	
It is important to match the announced name exactly with the phone book entry.
	▪ Digits (0..9)
	▪ Playback

▶ Memo   Switch phones

A voice memo can be saved directly from the main menu or during a telephone call.

This command is not displayed in the main menu and is only available via the voice control as long as the Multipoint function has been activated.

Handling via touch screen:

All displayed commands can also be operated intuitively via touch screen and are self explaining. Except the commands **Read new message, Read new emails** and **Dial Joe Bloggs.** The operation can be carried out via possibly existing arrow keys. With the red symbols   you can cancel an action or go a step back. With the green symbol   you can confirm actions.
