

welcome

Thank you for purchasing the mophie juice pack *air*[™]. You will now be able to travel great distances; be the master of your own destiny, no longer bound by the limitations of your iPhone 3G internal battery. Let's get Juiced!

features

The mophie juice pack *air*[™] enables virtually twice the battery life than the standard iPhone 3G battery and provides a comfortable ergonomic design with the complete protection of a hard shell case.

Here's a rundown of why the juice pack *air*[™] is so fantastic:

1. (Take a breath) Ergonomic, form-fitting, fully protective impact-resistant case-and-battery-in-one for iPhone 3G.
2. Integrated power switch allows you to put the juice pack *air*[™] in standby mode. Only use the battery when you need it. In standby mode (red), the juice pack *air*[™] still allows charge and sync capabilities in addition to the complete protection of a case.
3. Uses breakthrough rechargeable lithium polymer battery. (Much safer than those troublesome lithium-Ion batteries).
4. State-of-the-art battery technology virtually doubles your power... and you can even recharge it while it's still connected to the iPhone! This battery rocks.
5. Track battery power status at a glance with an integrated 4-light LED status indicator. Indicates charging mode and current battery life. Know before you go!
6. It's the included USB micro cable connection that allows you to charge and sync your iPhone while refilling your juice pack[™] at the same time. Really, you don't ever have to disconnect the juice pack[™], though it's a snap when you do.
7. Rechargeable for over 500 cycles. (These are FULL cycles. Partial cycles don't count as full. So, you can charge your juice pack[™] 10% of the way ten times before you get to a complete cycle. Don't be afraid to top it off.)
8. Smart battery technology actually instructs the iPhone to drain out the juice pack[™] first. When you're done with the juice pack[™] you can pull it off and still have a fully charged iPhone.
9. The juice pack *air*[™] offers complete protection from top to bottom. No more choosing between protection and power.
10. Built-in short circuit, over-charge and temperature protection. Safety First!

compatibility

Though the juice pack *air*[™] for iPhone 3G comes with a standard iPod/iPhone connection pin, this battery is intended solely for use with the Apple iPhone 3G. Please do not attempt to use the product with any other device - things could go haywire, but contact us if they do.

warranty

At mophie, we are dedicated to making the best quality products we can. To back this up, your juice pack[™] is warranted for 1 full year from the date of purchase.

charging your juice pack *air*[™] for iPhone 3G

Connect the juice pack[™] to a power source using the micro USB cable that came with your juice pack[™]. The USB cable can be plugged in to your computer or any "Works With iPhone" wall-plug style power source with USB out including the standard iPhone USB adaptor. (The LEDs located on the back of the device will blink when charging, as the juice pack[™] becomes more charged the LEDs will indicate how full it is, but one LED will remain blinking until completely full.)

important

The juice pack *air*[™] comes charged and ready to go, but after the initial use, normal charging will take only 2 to 3 hours for maximum power – AND you can then charge it while the iPhone is inserted or separately.

package contains

- mophie juice pack air™
- micro USB cable
- user manual

charging your iPhone 3G using the juice pack air™

If your iPhone is drained of power or if you want to extend the battery life of your iPhone, simply slide the iPhone into the juice pack air™. Make sure that the pin connector is securely inserted into the bottom of the iPhone and the switch is turned On (green). When the iPhone recognizes the juice pack™, a battery symbol will appear on the screen and you will hear a chirp from the iPhone, this indicates that the iPhone is charging and/or using the power from the juice pack™ rather than from the iPhone itself.

If your iPhone is drained of power, the juice pack™ will first charge your iPhone. If your iPhone is fully charged, the juice pack™ will act as your primary battery and no power will be lost from the iPhone internal battery until the juice pack™ is depleted. So you keep on talkin', rockin', surfin' and sendin'!

checking the status of the juice pack air™

You are always in the KNOW! To check the battery status of the juice pack™, press the button located on the lower back of the device. When pressed, the LED lights will illuminate for several seconds. Four LEDs means that the juice pack™ is fully charged, and one LED means that it is almost empty.

switching your juice pack air™ to stand-by mode

If you'd rather use your internal battery and not the juice pack™, use the switch on the bottom of the juice pack™, near the USB port to put the juice pack™ into stand-by mode. The dot near the switch will indicate whether the juice pack™ is in stand-by mode (red) or charging mode (green). When your internal battery is low, simply flick the switch On and your iPhone will begin charging immediately.

**Note: using the stand-by switch will give you even more total battery life, as the iPhone uses additional power to be on a constant charge.*

sync with your computer without removing the juice pack air™

While connected to the juice pack air™, you can still sync your iPhone with a computer. Simply connect the included micro USB cable from the juice pack air™ to the computer and sync your iPhone the same as if it was directly connected.

To keep your juice pack air™ operating to its fullest potential, make sure to do the following:

1. Keep your juice pack™ dry and away from moisture and corrosive materials.
2. Do not wash the juice pack™ with harsh chemicals, soaps or detergents. Just wipe the case with a soft, water-dampened cloth. Wipe the pins gently with a soft, dry cloth.
3. Re-charge your juice pack™ once every three months when not in use, and remember to charge it for one hour before putting it away the first time.

FAQ

What are the best methods for charging my juice pack air™?

Connect the mophie juice pack™ to a power source using the USB cable that came with your juice pack™. The USB cable can be plugged in to your computer or any "works with iPhone" wall-plug style power source w/ USB out.

How many charge cycles do you get in the juice pack air™ for iPhone 3G?

The juice pack air™ is rechargeable for over 500 cycles (These are full cycles. Partial cycles don't count as full. So, you can charge your juice pack™ 10% of the way 10 times before it counts as a complete cycle.) Don't be afraid to top it off!

What are the benefits of switching the juice pack air™ to stand-by mode?

Using the stand-by switch will give you even more total battery life, as the iPhone uses additional power to be on a constant charge.

Can I sync my iPhone 3G while the juice pack air™ is still connected?

You can charge and sync your iPhone to iTunes without removing it from its juice pack™ via the included micro USB cable.

What is mophie's return policy?

mophie reserves the right to claim a 20% restocking fee upon return. (For a full "Return Policy", please go to mophie.com)

warning

Read all instructions and warnings prior to using this product. Improper use of this product may result in product damage, excess heat, toxic fumes, fire or explosion, for which damages you ("Purchaser"), and not mStation or mophie (collectively "Manufacturer") are responsible.

- ⚠ Do not store battery in high temperature environment, including intense sunlight heat. Do not place battery in fire or other excessively hot environments.
- ⚠ Be cautious of excessive drops, bumps, abrasions or other impacts to this battery. If there is any damage to the battery such as dents, punctures, tears, deformities or corrosion, due to any cause, discontinue use and contact manufacturer or dispose of it in an appropriate manner at your local battery recycling center.
- ⚠ Do not disassemble this battery or attempt to repair or modify it in any manner.
- ⚠ Do not expose this battery to moisture or submerge it in liquid. Keep battery dry at all times.
- ⚠ Do not attempt to charge battery using any method, apparatus or connection other than the device's USB connector. For questions or instructions for the various ways to charge the juice pack™ refer to this manual's "Charging your iPhone 3G using the juice pack™" and "use summary" sections.
- ⚠ Do not attempt to replace any part of this battery.
- ⚠ If this battery is intended by Purchaser to be used by a minor, purchasing adult agrees to provide detailed instructions and warnings to any minor prior to use. Failure to do so is sole responsibility of purchaser, who agrees to indemnify Manufacturer for any unintended use/misuse by a minor.
- ⚠ All batteries have gone through a thorough quality assurance inspection. If you find that your battery is excessively hot, is emitting odor, is deformed, abraded, cut or is experiencing or demonstrating an abnormal phenomenon, immediately stop all battery use and contact Manufacturer.
- ⚠ For extended storage, first charge your battery for one hour.
- ⚠ Never dispose of batteries in the garbage. Disposal of batteries in the garbage is unlawful under state and federal environmental laws and regulations. Always take used batteries to your local battery-recycling center.

legal

This Battery is meant for use only in conjunction with the appropriate mobile entertainment device. Please consult your device packaging to determine whether this Battery is compatible with your particular mobile entertainment device. Manufacturer is not responsible for any damages to any mobile entertainment device incurred through the use of this product.

Manufacturer shall not in any way be liable to you or to any third party for any damages you or any third party may suffer as a result of use, intended or unintended, or misuse of this Battery in conjunction with any device or accessory other than the appropriate mobile entertainment device for which this battery is designed. Manufacturer will not be responsible for any damages you or any third party may suffer as a result of misuse of this Battery as outlined above. If you are responsible for battery use with an unintended mobile entertainment device and damages result from such use, you agree to indemnify Manufacturer for any resulting injuries to any third part(ies). mophie and juice pack are registered trademarks of mStation Corporation. iPhone is a registered Trademark of Apple, Inc.
