A. Via QSX Web Admin Page

To Get to QSX Web Admin Page

- 1. Once QSX is connected, hit the Info button on Content Controller.
- 2. If screen shows an IP address in the "My IP" field, go to Step 3. Otherwise, proceed to next page.
- 3. Open your internet browser and type in the IP address, followed by "/admin.htm" (e.g. http//140.242.16.45/admin.htm).
- 4. Click on LAN properties. Select "Enter IP Address Manually." After typing IP Address, Subnet Mask Gateway and DNS information, click the update button.
 - * By default QSX is DHCP enabled. If your network has a DHCP server, an IP address will automatically be assigned to the QSX.

3. Connect to QSX

- a. Open Hyperterminal, enter a name (e.g.-QSX) and click OK.
- b. Select COM1 (or the actual port) and click OK.
- c. Select bitrate of 115200 and click OK.
- d. The status bar at the bottom of the screen should say "Connected".
- e. Enter "ip" and hit return to see the IP configuration page.

4. Configure Static IP Address

- a. Enter "2", IP Address, Subnet Mask, Gateway and DNS
- b. Enter "Y" and the system will reboot.
